Corporate Capability Profile & Integrated Industrial Solutions

Company Tagline:

Powering Saudi Arabia's Industrial Future Across Civil, Mechanical, Electrical, Instrumentation & Manpower Solutions

:Arabic Title & Subtitle

شركة خدمة الجزيرة للمقاولات
ملف القدرات والخدمات المعتمدة — حلول المقاولات المتكاملة والدعم الصناعي في المملكة العربية السعودية

Primary Approved Vendor Badges:

- Saudi Aramco Vendor ID: 10048607
- Saudi Energy (SECO) Vendor ID: 5014538
- Zawil Port Pass Portal Vendor ID: 15222

Baseline Credentials:

Established 2010 | Headquartered in Dammam, Eastern Province, Kingdom of Saudi Arabia | Certified ISO 9001 · 14001 · 45001

SECTION 2

About The Company & Executive Statement

Corporate Narrative:

Al Jazeera Service Contracting Co. is a Saudi-based contracting and industrial support company established in 2010. Headquartered in Dammam, we deliver integrated contracting solutions across the Kingdom of Saudi Arabia. Our scope covers human resource support, civil and industrial construction, mechanical, electrical and instrumentation works, maintenance services, and equipment rental — engaged individually or combined into a single accountable contract. With extensive experience across industrial, commercial, infrastructure, and petrochemical sectors, we are committed to dependable solutions built on quality, safety, professionalism, and long-term client partnerships.

Executive Statement:

"Over the past 15 years, Al Jazeera Service Contracting Co. has grown by maintaining a simple operating philosophy: single accountability, transparent client communication, and zero compromise on safety and engineering quality. As the Kingdom accelerates under Saudi Vision 2030, our team is equipped to support industrial operators and main contractors with dependable, compliant, and rapidly mobilized solutions."

Key Highlights & Statistics:

- 15+ Years of Industry Track Record (Established 2010)
- 100+ Projects & Scopes Successfully Completed Kingdom-wide
- 03 Active National Approved Vendor Registrations (Aramco, SECO, Zawil)
- 100% Strict Adherence to SASO, OSHA & Saudi Labour Regulations
- Full Kingdom Coverage: Dammam, Jubail, Khobar, Riyadh, Western Region

SECTION 3

Vision, Mission & Core Values

Our Vision:

To be the Kingdom's benchmark contractor for safety, quality, and integrated industrial support services, driving industrial capability forward through localized expertise and global engineering standards.

Our Mission:

To deliver dependable, single-accountability contracting solutions—encompassing human resource mobilization, civil, mechanical, electrical, instrumentation, maintenance, and heavy machinery rental—that guarantee client operational readiness with superior precision.

Core Values:

- **Quality First:** Rigorous adherence to project specifications, international codes, and certified management systems.
- **Safety Without Compromise:** Zero-Harm policy, daily risk assessments, and continuous workforce safety training.
- **Single Accountability:** Managing multi-disciplinary scopes under one contract, eliminating interface friction and delays.
- **Client Partnership:** Building lasting commercial relationships through transparency, integrity, and dependable delivery.

Saudi Vision 2030 Alignment:

Al Jazeera Service Contracting Co. actively supports national economic diversification by prioritizing workforce Saudization, local industrial supply-chain development, energy sector resilience, and sustainable operational practices.

SECTION 4

Pre-Qualifications, Vendor Registrations & Accreditations

Official Approved Vendor Registrations:

SAUDI ARAMCO Approved Vendor Code: 10048607	SAUDI ENERGY (SECO) Approved Vendor Code: 5014538
ZAWIL PORTAL (BORDER GUARD) Approved Vendor Code: 15222	COMMERCIAL REGISTRATION (CR) Active & Compliant across KSA

International Management System Accreditations:

- **ISO 9001:2015:** Quality Management System (Certified by ANS & accredited under IAF MLA)
 - **ISO 14001:2015:** Environmental Management System (Waste reduction, pollution prevention, and ecological stewardship)
 - **ISO 45001:2018:** Occupational Health & Safety Management System (Workplace hazard prevention and personnel protection)
 - **IAF (International Accreditation Forum):** Multilateral Recognition Arrangement (MLA) ensuring global equivalency
 - **UAF (United Accreditation Foundation):** Internationally recognized accreditation integrity
-

SECTION 5

Services: Human Resource Support & Industrial Construction

01. Human Resource Support (Workforce Solutions)

Rapid deployment of certified skilled, semi-skilled, and general workforce for industrial operations, turnarounds, plant shutdowns, and construction projects across Saudi Arabia. Fully compliant with Saudi labor law, Qiwa, and GOSI platforms.

Key Capabilities:

- Short-notice workforce mobilization for emergency shutdowns and peak project phases
- Trade-tested personnel with certified safety backgrounds (OSHA / SASO / Aramco orientations)
- Complete logistical management: camp accommodation, medical coverage, PPE, and daily site transport
- Dedicated on-site supervisors, timekeepers, and bilingual HR coordinators

Trades & Classifications Supplied:

Civil Engineers, Mechanical Engineers, Electrical Engineers, HSE Officers, QA/QC Inspectors, Site Supervisors, Foremen, 6G / TIG / ARC Welders, Structural Fabricators, Industrial Pipe Fitters, Millwrights, Electricians, Instrument Technicians, Certified Riggers, Scaffolders, Heavy Equipment Operators, Mechanical Helpers, and General Laborers.

02. Industrial Construction

Construction of heavy industrial facilities, pre-engineered steel buildings (PEB), industrial warehouses, workshops, and utility enclosures tailored to the standards of petrochemical, energy, and manufacturing clients.

Key Capabilities:

- Structural steel detailing, shop fabrication, surface preparation, and site erection
 - Heavy industrial equipment foundations, reinforced machine plinths, and high-load slab design
 - Industrial wall cladding, roofing systems, louvers, acoustic dampening, and insulation
 - Fire-rated separation walls, explosion-proof construction elements, and industrial doors
-

SECTION 6

| Services: Civil Construction & Mechanical Engineering

03. Civil Construction

Complete ground-up civil engineering and infrastructure delivery for commercial complexes, residential compounds, industrial plant sites, and utilities.

Key Capabilities:

- Earthworks: bulk site excavation, backfilling, leveling, grading, and soil compaction testing
- Reinforced concrete substructures, raft foundations, boundary retaining walls, and drainage sumps
- Underground piping infrastructure: stormwater networks, sewer mains, and potable water systems
- Asphalt road paving, heavy-duty concrete pavements, curbs, walkways, and perimeter security fencing

04. Mechanical Construction & Piping

Industrial piping fabrication, static and rotating equipment erection, and structural mechanical integration for oil & gas, chemical, and heavy industrial facilities.

Key Capabilities:

- Carbon steel, stainless steel, and alloy piping spool fabrication, welding, and installation
- Hydrostatic and pneumatic pressure testing with calibrated recording gauges
- Static equipment positioning: pressure vessels, storage tanks, heat exchangers, and skids
- Rotating equipment precision alignment, dynamic balancing, torqueing, and bolt-tensioning
- Grit blasting, protective industrial coating applications, and thermal insulation wrapping

SECTION 7

Services: Electrical Works & Process Instrumentation

05. Electrical Engineering Works

Turnkey medium-voltage (MV) and low-voltage (LV) electrical distribution systems, substations, switchgear installations, and complete plant electrification.

Key Capabilities:

- Substation equipment installation, power transformers, switchgear, and panel boards
- Cable containment fabrication: heavy-duty cable trays, ladders, trenches, and conduits
- MV/LV power cabling, terminations, busducts, and Motor Control Center (MCC) wiring
- Plant earthing (grounding) grids, lightning protection systems, and surge suppression
- Hazardous-area explosion-proof lighting, emergency lighting, and small power distribution

06. Process Instrumentation, Automation & Control

Precision calibration, impulse tubing fabrication, PLC/SCADA control panel wiring, and field device commissioning for automated process plants.

Key Capabilities:

- Field instrumentation installation: Pressure, Temperature, Flow, Level, and Analytical transmitters
 - Stainless steel impulse line tubing, double-ferrule compression fittings, and manifold valve hookups
 - Control room panels, SCADA wiring, PLC racks, Marshalling cabinets, and Emergency Shutdown (ESD) circuits
 - Cold loop checking, hot loop simulation, signal verification, and multi-point calibration logs
-

SECTION 8

| Services: Facility Maintenance (AMC) & IT Low Current

07. Facility Maintenance & Annual Maintenance Contracts (AMC)

Predictive, preventive, and corrective maintenance programs designed to maximize plant uptime, protect capital assets, and extend facility lifecycle.

Key Capabilities:

- Turnaround and planned shutdown maintenance crews available 24/7
- Commercial and industrial HVAC maintenance, chiller servicing, and air handling units (AHU)
- MEP maintenance: plumbing systems, water booster pump stations, and fire-fighting networks
- Building fabric repair: concrete restoration, crack injection, waterproofing, and protective repainting
- Tailored Annual Maintenance Contracts (AMC) with guaranteed Service Level Agreements (SLAs)

08. IT, Telecommunications & Low Current Infrastructure

Enterprise structured cabling, CCTV surveillance networks, physical security access control, and low current communication systems for industrial facilities and offices.

Key Capabilities:

- Fiber optic cabling (Single-mode/Multi-mode) fusion splicing and Cat6A / Cat7 copper network routing
 - IP CCTV high-definition surveillance systems and Network Video Recorder (NVR) setup
 - Biometric access control, RFID turnstiles, automated vehicle boom barriers, and gate security
 - Public address (PA), industrial intercom, audio-visual (AV), and perimeter intrusion detection
 - Server room buildouts: equipment racks, cable management, clean power UPS, and climate monitoring
-

SECTION 9

Service 09: Heavy Equipment Rental & Modern Fleet

Fleet Overview:

Al Jazeera maintains an extensive company-owned fleet of modern, certified heavy equipment, earthmoving machinery, power generation sets, and site logistics vehicles. Available for daily, monthly, or long-term project hire across Dammam, Jubail, and the Kingdom. All machinery includes valid 3rd-party safety certification (TUV / SGS / Bureau Veritas) with optional certified Aramco-approved operators.

Equipment Catalogue:

- **Mobile Cranes:** All-terrain and rough-terrain cranes from 25 Ton to 100 Ton capacity
- **Tower Cranes:** Heavy construction lifting cranes for high-elevation works
- **Boom Trucks:** 7 Ton to 15 Ton flatbed transport trucks equipped with hydraulic knuckle booms
- **Excavators:** Heavy tracked excavators with standard digging buckets and hydraulic rock breakers
- **Backhoe Loaders:** Multi-purpose wheeled backhoe excavators for trenching and loading
- **Forklifts:** 3 Ton to 10 Ton diesel and electric warehouse and yard material handlers
- **Man Lifts (MEWPs):** Telescopic boom lifts and electric/diesel scissor lifts (12m to 28m height)
- **Drum Rollers & Compactors:** Heavy vibratory soil and asphalt compaction rollers
- **Diesel Power Generators:** 50 kVA to 500 kVA heavy-duty silent sound-attenuated diesel units
- **Air Compressors:** 185 CFM to 750 CFM mobile diesel screw compressors for sandblasting and tools
- **Tower Lights:** High-mast mobile trailer lights with 4 × 1000W floodlight arrays
- **Welding Machines:** Multi-process diesel engine-driven field welding sets
- **Trailers & Transport:** Flatbed trailers, low-bed heavy transport, and worker transport buses

SECTION 10

Health, Safety, Environment (HSE) & Quality Assurance

Zero-Harm Health, Safety & Environment Policy:

At Al Jazeera Service Contracting Co., the safety and physical well-being of our employees, client staff, and surrounding communities take absolute priority over all operational and schedule demands. Our target on every workfront is Zero Incidents, Zero Injuries, and Zero Environmental Harm.

HSE Operational Framework:

- **Task Risk Assessments (TRA):** Comprehensive hazard identification conducted prior to commencing any work scope.
- **Daily Morning Toolbox Talks (TBT):** Mandatory daily safety meetings conducted in multiple languages covering specific hazards, heat stress, working at heights, and emergency protocols.
- **Permit-to-Work (PTW) Compliance:** Strict adherence to Hot Work, Cold Work, Confined Space Entry, and Lockout/Tagout (LOTO) procedures.
- **Certified PPE:** Mandatory provision and strict enforcement of certified protective personal equipment across all work sites.
- **Environmental Protection:** Chemical containment trays, regulated hazardous waste disposal, spill response kits, and noise mitigation.

Quality Assurance & Quality Control (QA/QC):

- Project Quality Plans (PQP) tailored to client and Aramco standards under ISO 9001:2015 certification
 - Material Receiving Inspections (MRI) verifying mill test certificates, heat numbers, and compliance logs
 - Stage-wise Inspection & Test Plans (ITP) verified by dedicated site QA/QC inspectors
 - Third-party Non-Destructive Testing (NDT): Radiography (RT), Ultrasonic (UT), Magnetic Particle (MPI), and Dye Penetrant (DPT)
 - Complete client-approved handover dossier including as-built drawings, warranties, test certificates, and operation manuals
-
