COMPANY PROFILE

Built On 15+ Years Of Saudi Industrial Dedication

Al Jazeera Service Contracting Co. is a Saudi-based contracting and industrial support company established in 2010. Headquartered in Dammam, Eastern Province, we deliver integrated engineering and workforce solutions across the Kingdom of Saudi Arabia.

SAFETY RECORD

Executive Statement

"From regional roots to Kingdom-wide turnkey execution, our growth is powered by single-point accountability, uncompromised quality, and strict adherence to international safety regimes. We proudly support Saudi Arabia's industrial transformation, delivering dependability on every project site."

STRATEGIC DIRECTION

Vision, Mission & National Alignment

Our corporate roadmap aligns with Saudi Arabia's industrial expansion, combining localized operational agility with global engineering rigor.

Our Vision

To be recognized as the premier multi-disciplinary industrial contractor and workforce solutions partner in the Kingdom of Saudi Arabia, trusted by global energy majors and industrial leaders for unmatched execution safety, technical competence, and reliability.

Our Mission

To deliver complete, single-contract engineering and industrial support—from manpower mobilization and construction to electrical, instrumentation, and maintenance services—enabling clients to reduce contractor interfaces and execute projects seamlessly.

Core Operating Values

Quality First

Zero tolerance for substandard workmanship. Strict QA/QC protocols.

Safety Always

Zero-Harm culture, daily toolbox meetings, and full SASO/OSHA adherence.

Accountability

A single responsible contract eliminating sub-tier coordination failures.

Client Trust

Long-term partnerships built on transparent pricing and timely delivery.

Vision 2030

Committed to Saudi Vision 2030

Actively supporting national industrial localization, sustainable infrastructure diversification, workforce saudization, and local supply chain resilience across the Kingdom's mega-developments.

PRE-QUALIFICATIONS

Accreditations & Approved Vendor Codes

Our quality management systems and technical competency are validated by international auditing bodies and accredited by premier national infrastructure authorities.

APPROVED VENDOR REGISTRATIONS

**Saudi Aramco**

National Petroleum & Gas Major

Vendor Code: 10048607**Saudi Energy (SECO)**

Power Generation & Grid Utilities

Vendor Code: 5014538**Zawil Port Pass Portal**

Border Guard & Seaport Facilities

INTERNATIONAL MANAGEMENT SYSTEM ACCREDITATIONS

**ISO 9001 · 14001 · 45001**

Integrated Management System covering Quality Assurance, Environmental Protection, and Occupational Health & Safety.

**IAF MLA Recognition**

International Accreditation Forum
Multilateral Recognition Arrangement
ensuring global technical equivalence.

**UAF Full Accreditation**

United Accreditation Foundation
international assessment affirming
high standard operational integrity.

— SERVICE LINES 01 & 02

Human Resource Support & Industrial Construction

01. Human Resource Support

Rapid deployment of multi-disciplinary skilled, technical, and general workforce for construction sites, shutdowns, and long-term industrial operations.

- Fast-track mobilization on short notice
- 100% compliance with Saudi labour regulations & Qiwa
- On-site supervision, camp housing, and daily logistics
- Rigorous safety orientation & trade testing

Key Trades Supplied:

Project Managers, QA/QC & Safety Officers, 6G Welders, Pipe Fitters, Millwrights, Electricians, Instrument Technicians, Certified Riggers, Scaffolders & Heavy Operators.

02. Industrial Construction

Turnkey construction of heavy manufacturing plants, industrial warehouses, pre-engineered buildings (PEB), and specialized support facilities.

- Heavy structural steel fabrication & safe erection
- Specialized heavy machinery foundations & slabs
- Industrial warehouse cladding, roofing & insulation
- Fire-rated walls, acoustic enclosures & ventilation

Typical Sectors Served:

Petrochemical processing units, logistics distribution hubs, steel rolling mills, fabrication workshops, and utility transfer complexes.

— SERVICE LINES 03 & 04

Civil Construction & Mechanical Engineering

 Civil Construction

03. Civil Construction

Complete ground-up civil engineering works for commercial compounds, industrial infrastructure, underground utilities, and road paving.

- Earthworks: bulk excavation, backfilling & grading
- Reinforced concrete substructures, raft foundations & plinths
- Stormwater networks, sewer drainage & culverts
- Internal asphalt road works & heavy duty paving
- Perimeter security fencing & boundary walls

Standards Compliance: ACI, SASO, and MOT road engineering specifications.

04. Mechanical Works & Piping

Industrial piping fabrication, static and rotating equipment erection, and structural mechanical integration for plant environments.

- CS, SS & Alloy pipe spool fabrication & site welding
- Hydrostatic pressure testing & pneumatic lines
- Static equipment erection: pressure vessels & tanks
- Rotating machinery precision alignment & torqueing
- Sandblasting, industrial painting & thermal insulation

Welding Quality: ASME IX qualified welders, NDT radiography, and visual inspection.

— SERVICE LINES 05 & 06

Electrical Works & Process Instrumentation

 Electrical Works

05. Electrical Engineering

Turnkey medium-voltage (MV) and low-voltage (LV) electrical distribution systems, substations, and plant electrification.

- Substation equipment positioning & transformer cabling
- Cable tray containment fabrication & conduit routing
- Motor Control Centers (MCC), switchboards & VFD panels
- Plant earthing (grounding) grids & lightning protection
- Explosion-proof hazardous area lighting systems

Testing Protocols: Insulation resistance, megger tests, hi-pot testing, and phase rotation.

 Instrumentation Works

06. Instrumentation & Control

Precision calibration, loop checking, control room panel wiring, and field device commissioning for automated processing plants.

- Pressure, temperature, level & flow transmitter setup
- Stainless steel impulse tubing & manifold hookups
- PLC, SCADA, and DCS marshalling cabinet integration
- Emergency Shutdown (ESD) & safety interlock testing
- Cold & hot loop checking with certified calibrators

Calibration Accuracy: NIST traceable calibration standards and certified test logs.

— SERVICE LINES 07 & 08

Facility Maintenance (AMC) & IT Low Current

Facility Maintenance

07. Maintenance & AMC Services

Predictive, preventive, and emergency facility management and annual maintenance contracts tailored for continuous operational readiness.

- Plant shutdown and planned turnaround maintenance
- Commercial & industrial HVAC chiller overhauls
- MEP repairs, pump stations, plumbing & water treatment
- Building structural repairs, waterproofing & civil repainting
- 24/7 emergency response teams with guaranteed SLA

Asset Longevity: Computerized maintenance tracking and detailed logs.

IT & Low Current

08. IT & Low Current Systems

Enterprise structured cabling, security surveillance, access control, and low current network infrastructure for industrial plants and offices.

- Fiber optic & Cat6A / Cat7 structured network cabling
- IP CCTV high-definition security camera systems
- Biometric access control, speed gates & barrier gates
- Public address (PA) & industrial intercom systems
- Server room rack setup, clean power UPS & cooling

Certifications: Certified optical fiber splicing and OTDR network testing.

— SERVICE LINE 09

Heavy Equipment Rental & Modern Fleet

Company-owned, certified equipment fleet available for short-term and long-term project hire across the Kingdom. All machinery is delivered with valid 3rd-party safety certification and optional licensed operators.

**Mobile Cranes**

25 Ton to 100 Ton all-terrain & rough terrain

**Tower Cranes**

High-elevation lifting for major construction

**Boom Trucks**

7T to 15T with hydraulic crane boom

**Excavators**

Tracked heavy earthmoving & rock breaking

**Backhoe Loaders**

Versatile site trenching & utility excavation

**Forklifts**

3T to 10T diesel & electric material handlers

**Man Lifts**

Telescopic & scissor lifts up to 28m height

**Drum Rollers**

Soil & asphalt heavy vibration compactors

**Power Generators**

50 kVA to 500 kVA silent diesel units

**Air Compressors**

185 to 750 CFM for blasting & air tools

**Tower Lights**

High-mast 4-lamp mobile night lighting

**Welding Machines**

Multi-operator diesel engine welding sets

Fleet Certification & Safety:

Periodic 3rd-party inspections (TUV / SGS / BV). All operators hold valid SAG and Aramco certification.

24/7 Fleet Dispatch

HSEQ COMMITMENT

Health, Safety, Environment & Quality

At Al Jazeera Service Contracting Co., the safety of our personnel and client worksites takes unconditional precedence over all operational demands.

Our Zero-Harm Safety Policy

We operate under a clear mandate: every worker returns home safely every single day. Our safety protocols match the demanding standards of Saudi Aramco and SABIC.

- Mandatory daily morning Toolbox Talks (TBT)
- Formal Task Risk Assessment (TRA) before work begins
- Strict Permit-To-Work (PTW) protocols & audits
- Mandatory certified PPE on all workfronts
- Continuous safety refresher training for crews

Quality Assurance & Control

Certified under ISO 9001:2015, our comprehensive Project Quality Plans (PQP) enforce inspection benchmarks at every project milestone.

- Material receiving inspection & Mill Test Reports
- Stage-wise Inspection and Test Plans (ITP)
- Third-party Non-Destructive Testing (NDT)
- Certified hydro-testing and megger dielectric logs
- Comprehensive client-approved handover dossiers
